

Dictation Contest (PR Jr, 初級) No.40

Hana: Hey Tim, have you been to any other countries?

Tim: Yes, I have

Hana: Which countries have you been to?

Tim: Hmm, I have been to America and France and Hong Kong and Taiwan and Thailand and Indonesia and Vietnam.

Hana: Wow! What country would you like to visit next?

Tim: I really want to go to Italy, because it is the land of pizza!

Dictation Contest (PR 1, 中級) No. 40

Hana: Hey Tim, have you been to many other countries besides Japan?

Tim: Yeah, I have been to a few

Hana: Hmm. Which countries have you been to?

Tim: Well, I've been to America and France and Ireland and the Czech Republic and Greece and Spain and Hong Kong and Taiwan and Korea and Indonesia and Singapore and Malaysia and Thailand and Vietnam and Laos and Cambodia and the Philippines.

Hana: Wow. Out of those, which country would you most like to go back to?

Tim: Probably Thailand, because it is such a beautiful country but I have only seen a small part of it.

Hana: What country would you like to go next?

Tim: Hmm, I really want to go to Iceland, because the scenery is spectacular!

Dictation Contest (PR 2 上級) No. 40

Hello everyone how are you all doing? I hope you guys are doing good this is another video for the PR2 dictation contest and today I would like to use an extract from the Rikkyo University entrance exam reading section. So if you guys are interested in Rikkyo University, you guys are going to apply for the University...you better tune into this. Ok, here we go.

When Janet Hemingway started her career in mosquito research in 1977, a child was dying of malaria every 10 seconds. Yet the disease, and the mosquitoes that carry it, were low on the global health priority list. Today, the landscape has been transformed. Scientists at the prestigious Liverpool School of Tropical Medicine in the United Kingdom, which Hemingway now heads, have sequenced the genomes of at least 23 mosquito species, looking for clues that might help them conquer the disease. And malaria has surged to the top of the global agenda. Thanks to a mass of new funds, deaths have declined.

Did you guys understand that? How did you guys do? Anyway, I'll see you guys in the next video, so bye guys!
