

Dictation Contest (PRJr 初級) No. 53

Hello everyone, my name is Bina and today we will read Doraemon. Are you ready?

If you put this on a little rock and polish it well, it'll start acting like a dog. Here is some pet cream.

What kind of rock?

Anyone that you like. It will be exactly the same as a real dog.

Great job everybody. See you next time.

Dictation Contest (PR1 中級) No. 53

Hey everyone. This is PR 1 dictation. We will base it on the Eiken level 2 textbook. Here we go.

Emily bought an old oil painting at a street market on Saturday. That evening she did some research about artists on the Internet. She learned that the artists' paintings were well-known among young art fans. She plans to put it on a wall in her living room, so she can show her friends.

Ok, did you guys do well? I'll see you guys in the next video. Bye.

Dictation Contest (PR2 上級) No. 53

Hello everyone. For today's PR2 dictation contest, we are going to be reading from the Tokyo University exam. Are you ready?

The old-fashioned stereotype that women are not suited by nature at mathematical study suffered a major blow in 2014 when Maryam Mirzakhani became the first woman to receive the Fields Medal, math's most prestigious award. An equally important blow was struck by an Italian mathematician Maria Gaetana Agnesi, born three hundred years ago. Agnesi was the first woman to write a mathematics textbook and to be appointed to a university chair in math, yet her life was marked by paradox. Through brilliant, rich and famous, she eventually chose a life of poverty and service to the poor.

Good job everybody. See you next time.
