

Dictation Contest (PRJr, 初級) No. 77

Hello, everyone!

Are you ready to read another nice story together? Let's go!

Biff had a crab in her hand. "Put it back," said Chip. Biff put the crab back. "Let's look on the sand," said Dad. "Come and see this," said Chip. He had a net. "Look at this shell," said Kipper. "This is the best of all." The shell had legs. "What is it?" asked Kipper. "It's a hermit crab," said Dad. "It's a crab that lives in a shell." "Put it back," said Kipper.

Okay, guys, see you soon!

Dictation Contest (PR1, 中級) No. 77

Hey, guys! How's it going?

Today, I'm going to be continuing with that mysterious story that I have been reading. So, here we go:

As Luke cleans R2-D2, he accidentally unlocks part of Princess Leia's message. "Help me, Obi-Wan Kenobi. You're my only hope." Luke wonders if she means the old hermit Ben Kenobi, who lives far off in the desert. That night, R2-D2 runs away to deliver his message.

Hmm, what do you think? Could Obi-Wan Kenobi and Ben Kenobi be the same person? No way!

Alright, guys, I'll see you next time. Bye-bye!

Dictation Contest (PR2 上級) No. 77

Hey, guys! How are you doing?

Hope you're all still staying careful and safe. In a recent video, I told you about a meteor that was seen flying over Tokyo, and, well, apparently, they found where it landed. Listen to this:

A fireball that brightened the Tokyo sky in early July has been identified as a meteor after fragments were found in a neighbouring prefecture, a national science museum said July 13th. The meteorite, which landed on a condominium in Narashino, Chiba Prefecture, is believed to have originally had a diameter of a few centimeters but likely broke into two pieces, according to the National Museum of Nature and Science. The pieces weigh 63 grams and 70 grams, respectively, it said.

Hmm. Well, I imagined it as being a little bit bigger than that, but it's still pretty cool that a rock came from somewhere in outer space all the way down to earth and landed on somebody's house. It's a little scary, too, I guess. By the way, do you know the difference between a meteor and a meteorite? Let me know if you do, okay?

Alright, guys, as always, study hard, stay safe, and I'll see you soon.
