

Dictation Contest (PRJr, 初級) No. 78

Hello, everyone!

Can you do this? Let me show you how to do it.

First, put your hands together and spread your fingers.

Then, cross your middle fingers.

Then, rotate your hands like this. And that's it!

Pretty fun right? Please try that at home and then come and show me, okay?

Alright, guys, see you soon!

Dictation Contest (PR1, 中級) No. 78

Hey, everyone! How's it going?

Before I continue with my mysterious story, do any of you know what it is yet? Can you guess what this famous story is? No? Well, I guess I had better keep reading then...

At dawn, Luke and C-3PO race off in a landspeeder to find R2-D2. When they finally reach the little droid, vicious Sand People attack! Luckily, a mysterious cloaked man comes to the rescue. It is Ben Kenobi!

'Ben Kenobi'... I wonder if he is related to Obi-Wan Kenobi from Leia's message? I guess we'll just have to wait and see!

Okay, guys, see you next time.

Dictation Contest (PR2 上級) No. 78

Hey, guys! How are you doing?

Hope you're all still staying careful and safe.

Have any of you heard of Stonehenge? It's one of the most famous historical sites in the world and one of England's biggest tourist attractions, and now, there is something new...

Archaeologists have discovered a wide circle of deep pits surrounding an ancient settlement near Stonehenge, opening up new lines of investigation into the origins and meaning of the mysterious prehistoric monument. Among Britain's most recognizable landmarks, the standing stones at Stonehenge draw tourists from all around the world, as well as people searching for spiritual connections with the past. Their exact purpose remains unknown to scientists. The new discovery, by a team of archaeologists from several universities, shows a two-kilometer wide circle of shafts surrounding a settlement at Durrington Walls, which also included a henge made of timber posts.

Ooh, very interesting. I'm not quite sure what this new discovery means, but I recommend doing a little bit of research on Stonehenge because it's pretty fascinating. Alright, guys, as always, study hard, stay safe, and I'll see you soon.
